DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 11-15 and 108-115 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 126-145 of copending Application No. 09/758,008 in view of Klersy et al. (U.S. Patent No. 5,177,567). The copending application does not expressly disclose the chalcogenide layer being formed atop a conductive layer. Klersy (esp. Fig. 4) discloses a chalcogenide device similar to that of the instant application including a conductive layer (1b). It would have been obvious to one skilled in the art at the time of the invention to use a conductive layer as disclosed by Klersy for the device of 09/758,008 for the purpose, for example, enhancing the switching structure of the chalcogenide layer (Klersy; column 5, lines 59-65).

This is a provisional obviousness-type double patenting rejection.
